Experience

Frontend Engineer (Part-time)	**Kento Studio**	**2022 - 2023** · (10mo)

🌐 Developed responsive websites and applications, including "Shakespeare Lodge," a property rental platform that was solely created and managed.

🚀 Utilized technologies such as Next.js, React, and TypeScript for frontend development, staying up-to-date with industry trends and new tools.

🧩 Implemented Node.js for managing rental property data and enabling email communication through Nodemailer and MailGun, ensuring seamless functionality.

🏠 Developed the "Shakespeare Lodge" project, a user-friendly web app with features including:
- A streamlined four-step booking form with yup validation for a smooth user experience.
- Integration of the mailing API using Nodemailer and MailGun for efficient email communication.
- Dynamic property pages with detailed information and images to showcase rental properties effectively.
- A date range calendar for selecting stay dates, enhancing booking convenience.
- Smart autofill of property details in the booking form, improving efficiency and accuracy.

Frontend Engineer	**Crisp Studio**	**2022 - 2023** · (1yr 2mo)

🌱 Developed and customized Shopify themes for large marketplaces, enhancing user experience and performance, including the successful Rowse and Roble projects.

🗣️ Actively participated in client calls, working closely with the Rowse team, Roble store team to understand their needs, provide technical insights, and ensure project alignment with their vision.

🔍 Implemented custom integrations using JavaScript and Liquid code to expand Shopify store functionality, enabling custom implementations and significantly boosting sales.

✨Designed a unique Shopify theme from scratch for Rowse, a popular plant-based beauty brand, ensuring it matched their style and needs perfectly. This theme looked great and worked even better.

🛒 Expertly resolved complex bugs and issues through thorough debugging and troubleshooting, improving the the functionality of website features, resulting in increased sales.

📚 Maintained and updated existing codebases for broad compatibility, including a flexible blog for Rowse that allowed easy content changes and additions.

💼 Delivered multiple Shopify themes for large marketplaces, leading to increased user engagement and sales. Developed re-usable sections for the Rowse and Roble websites, saving time and ensuring a consistent appearance.

Education

Bachelor of Science	**Wrocławska Akademia Biznesu**	*Wroclaw, Poland*	**2021-2025**

- Computer Engineering, E-commerce

Skills

- JavaScript , TypeScript, Next.js, React, Redux, Node.js, MongoDB, Firebase, Liquid code (Shopify template language), Shopify CMS, HTML, CSS, Sass, Tailwind CSS
- Languages: English(Upper Intermediate), Polish(Intermediate), Ukrainian(Native Speaker)
